

## RECO-TRAC™ High Density 100% Recycled Heavy Duty Polyethylene Trackway 30mm x 1m x 3m

Easily carried and installed by hand our Reco-Trac system is ideal for pedestrian walkways, temporary car parks and heavy Civils works.

With unique features compared with other single piece systems, the modular design comprises of seven interlocking tongue and groove planks. This allows each individual piece to be easily replaced if damaged, thus prolonging the lifespan of the system.

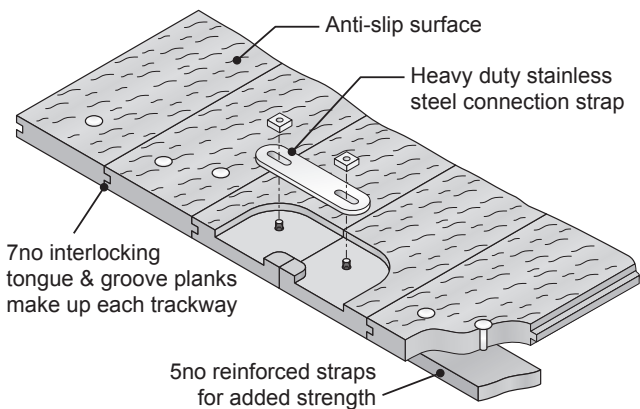

The simple yet strong fixing system enables the Trackway to be deployed and installed quickly by hand without the use of any specialist tools.

The Reco-Trac system can be supplied in any colour with your own company logo.

### Building Research Establishment Tested

The Polyethylene tongue and groove system was tested by the BRE to **144 Tonnes** loading per square footage.

*NB This weight load distribution is subject to ground conditions.*
