

HDPE* Ground Mat Recycled Polyethylene panels 1.2m x 2.4m

Manufactured with an anti-slip tread ideal for pedestrian access around construction sites, festivals and shows.

Light weight and easily lifted and installed by hand, this Ground Mat system can also accommodate rubber tracked and wheeled plant.

Comes complete with double and single joiners enabling the mats to be linked together to form a safe stable walkway or roadway.

*HDPE (High-Density Polyethylene)
Weight approx 42kg each.
